

Himanshu Sharma

Graduate in Computer Application

"Hello! I'm Himanshu, and I've been immersed in the world of web development for over 1 year, with a primary focus on building dynamic and responsive user interfaces. I have a solid foundation in front-end technologies, with expertise in HTML, CSS, JavaScript and ReactJs. Over the years, I've honed my skills in React, and I find its component-based architecture particularly powerful for building scalable and maintainable applications.

Lt. Atul Katariya Memorial School

03/2016 - 05/2017

Gurugram, India, 89%

WORK EXPERIENCE

Software Developer ReactJS

Giglabz Private Limited

11/2022 - Present

Bangalore/Work from home

India

Project 1

- Collaborated with a team of developers to design and implement new features for a web application regarding a **Learning Management System School Project** using ReactJS.
- Developed and maintained responsive web pages, enhancing the user experience, used reusable components, shorter and cleaner code with optimizing performance.
- Delivered code within the due dates with cleaner code and maximum use of react features.
- Participated in daily stand-ups and sprint planning meetings, actively contributing to the team's agile development process.

Project 2

Parking Webiste - POLUS

10/2023 - Present

Giglabz Private Limited

Bangalore /work from home

Achievements/Tasks

- Project consists of admin Login, users creation page, page for cars with clean plate, page for unclean pages which are corrected with AI and one reviewer page.
- Created User mapping page (UI and Data implementation using APIs), the Reviewer page UI with the API implementation and some other similar pages and delivered without bugs.
- The main objective was to create the UI according to figma and deliver the features on time which we were able to achieve in every feature delivery
