Himanshu Sharma
Graduate in Computer Application

"Hello! I'm Himanshu, I have a bachelor degree in Computer Science and I build web pages with a primary focus on building dynamic and responsive user interfaces. I have a solid foundation in front-end technologies with expertise in HTML, CSS, JavaScript and ReactJs. Over the years, I've honed my skills in React and I find its component-based architecture particularly powerful for building scalable and maintainable applications.

WORK EXPERIENCE

Software Developer
Giglabz Private Limited

11/2022 - Present   *India*
Bangalore/Work from home

Project 1
- Collaborated with a team of developers to design and implement new features for a web application regarding a **Learning Management System School Project** using ReactJS.
- the project consisted of 8 admins for different usages and the project is for made to make online teaching easier in which the schools which buy our application access are added , they will have acess to school admin teacher student and content creation .
- Developed and maintained responsive web pages, enhancing the user experience ,used re-usable components,shorter and cleaner code with optimizing performance.
- Participated in daily stand-ups and sprint planning meetings, actively contributing to the team's agile development process.
- Worked in a **Car Parking Project** in which we managed 2 different admin - Manager and Analyst , the project consists of AI images of parking time violating cars which can be reviewed with our application.
- I was the lead manager of the project at front-end and delivered all the pages within the allocated time span with the designs discussed with the client.
- We used Styled components , Ant Design and maintained a clean maintanable and easy to understand code with all the pages responsive for big as well as smaller screens.
- Worked on a **Case Management System** project for the company . Reviewed and managed bugs informed by client in the project and managed a few screens given to me.
